Data sheet

TERMINAL BLOCK TP3I W. LED SCREW TERM.

Connection module TP3 8 channels u. 2x10 terminals f. Potential supply Type: Screw terminal with LED, VPE=1 unit 16 pole IDC connector f. cable

target system	SIMATIC S7-300 / 1500		
suitability for use	Digital I/O modules		
product type designation	Fully modular connection		
product designation	Connection module		
electrical data			
operating voltage			
at DC / rated value	24 V		
rated value	24 V		
• at DC / maximum	28.8 V		
ampacity / per pin / maximum	1 A		
continuous current / at DC / per signal cable / maximum	1 A		
total current / maximum	4 A		
display version / as status display of the inputs/outputs	LED yellow for "active high"		
display version / for power supply / power LED	Yes; green for 24 V DC O.K.		
product component / PE connection	No		
product component / shield connection	No		
product component / disconnector	No		
product function / infeed function	Yes		
product feature / cross-connectable	No		
connection method			
- Connection method			
number of terminals	28; 8 x I/O; 10 x L+, 10 x M		
	28; 8 x I/O; 10 x L+, 10 x M 8		
number of terminals			
number of terminals number of channels	8		
number of terminals number of channels number of terminal levels	8 1		
number of terminals number of channels number of terminal levels type of connecting terminal	8 1 Screw-type terminal		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal	8 1 Screw-type terminal Top		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection	1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule.		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection design of terminal / terminal levels internally linked	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule. No		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection design of terminal / terminal levels internally linked type of connectable conductor cross-sections / solid	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule. No		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection design of terminal / terminal levels internally linked type of connectable conductor cross-sections / solid connectable conductor cross-section	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule. No No		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection design of terminal / terminal levels internally linked type of connectable conductor cross-sections / solid connectable conductor / with core end processing	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule. No No 0.5 2.5 mm²; End sleeve according to DIN 46228/1		
number of terminals number of channels number of terminal levels type of connecting terminal position / of the terminal type of electrical connection / for connecting cable number of cables / per connection design of terminal / terminal levels internally linked type of connectable conductor cross-sections / solid connectable conductor cross-section • for flexible conductor / with core end processing • stranded	8 1 Screw-type terminal Top Plug-in connection 2; Connection for internal system: Combination of 1 or 2 Wires until the sum total of cross sections be achieved in a ferrule. No No 0.5 2.5 mm²; End sleeve according to DIN 46228/1 0.5 2.5 mm²

marketing text	potential connection with screw interface between the connection field and the SIMATIC S7. This is adapted to the respective task the This connection module is partic connection for the fastest and sa costs, error sources in cabling cactuators from the peripherals a	The TP3 connection module for a 3-wire connection with 8 channels and potential connection with screw terminals and LED for signalling forms the interface between the connection cables of the peripherals coming from the field and the SIMATIC S7. This is mounted on the DIN rail and is exactly adapted to the respective task thanks to its functionality with screw terminals. This connection module is part of the fully modular SIMATIC TOP connect connection for the fastest and safest system cabling. In addition to low wiring costs, error sources in cabling can be significantly reduced. Sensors and actuators from the peripherals are combined with the connection modules of SIMATIC TOP connect and connected to the SIMATIC S7-1500 via cable and front plug-in module.
